Leaders In Slurry & Bulk Material Handling, Process Instrument & Controls

Flowrox – Participating Partner

It's a tough job, but there are people who can do it.

They work in some of the most challenging conditions on the planet. They run extremely abrasive or corrosive processes, often in remote locations.

They are our customers.

Whether they do business in mining, metallurgy, energy, cement, pulp & paper, chemical or other heavy duty industries, we are there for them.

And we are glad to help.

EXPERIENCE WITH INSIGHT

Flowrox has over 30 years of experience with more than 100,000 global deliveries.

Each installation has helped us better understand our customers' needs and the environment they work in. Our extensive database and expertise ensure that

even your toughest requirements are met with our solutions.

PARTICIPATING PARTNER

The best results have always been achieved by close cooperation between

experts of various disciplines.

That is why we appreciate long-term partnerships with our customers. We are inspired by their success and are proud of being part of it.

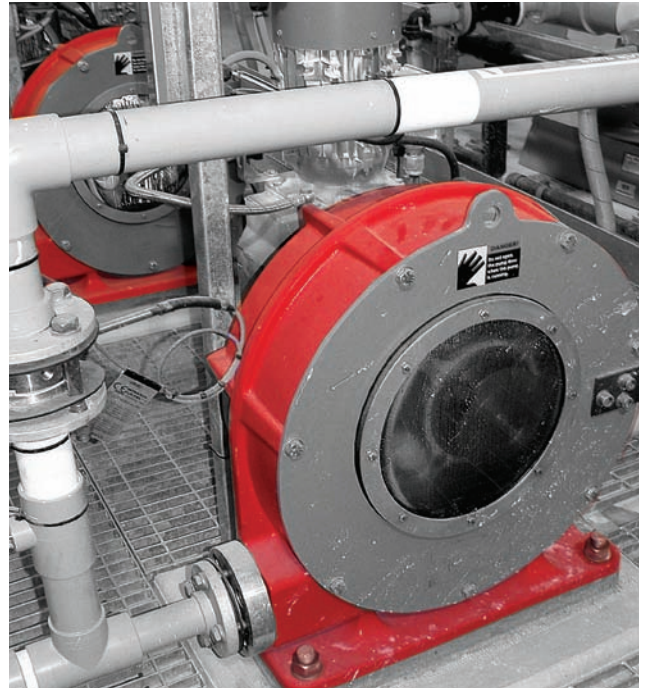

FACILITATING PERFORMANCE

Flowrox exists to increase customers' productivity by offering them products and services that improve efficiency and extend service intervals.

Our solutions provide the lowest total cost of ownership, the best performance and a trouble-free operation.

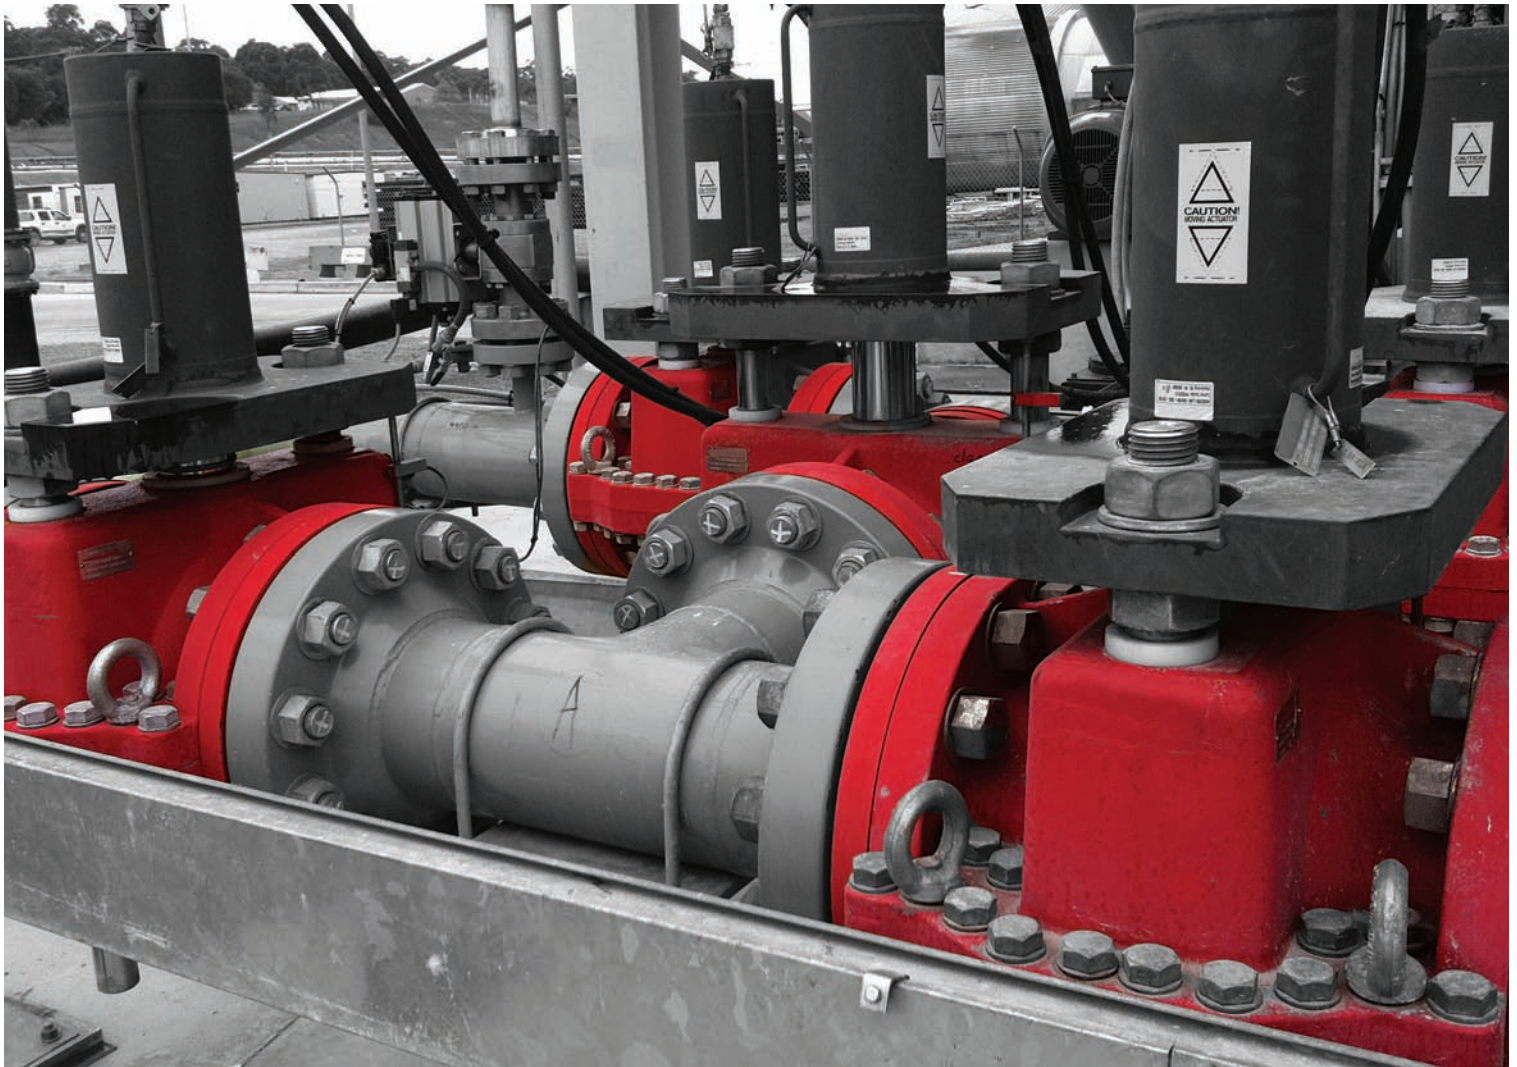

Experience with Insight.

Participating Partner.

Facilitating Performance.

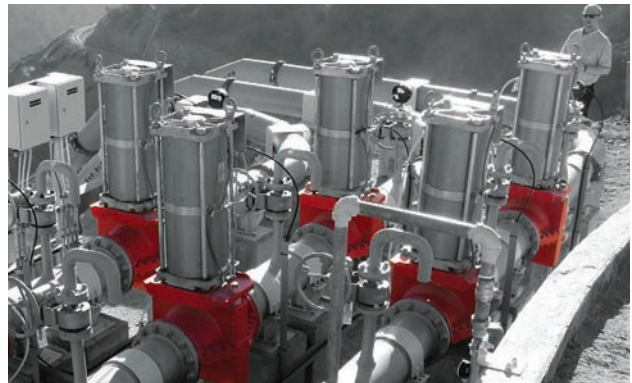

Flowrox is the Industry Benchmark

Flowrox is known for its reliable solutions for demanding process conditions. Our main focus is on the Mining, Minerals & Metallurgy and Energy, Construction & Environment industries, but we have solid expertise in various other fields, too. With nearly 40 years of experience in elastomer technology, Flowrox is the benchmark in heavy duty valves, pumps and systems.

MINING, MINERALS & METALLURGY

Flowrox has provided solutions for high-wear and aggressive processes in more than 50,000 installations in mining, metallurgy and mineral applications around the world. Flowrox valves and pumps have proven their superior quality, reliability, excellent wear-resistance and anti-jamming properties in these applications.

ENERGY, CONSTRUCTION & ENVIRONMENT

Flowrox products offer the utmost reliability, the lowest total cost of ownership and most importantly the longest operating time. They have been used very successfully in energy, construction and environment industry applications for several decades. Our products improve our customers' efficiency and have proven their performance in the toughest process conditions.

OTHER INDUSTRIES

Flowrox products have also proven their suitability for a wide range of other industries and applications, e.g. chemical, food & beverage and pulp & paper.

Flowrox Portfolio

Flowrox products are environmentally friendly and cost effective solution for demanding industrial flow control applications.

Flowrox valves

Pinch Valves

For shut-off/control applications involving abrasive or corrosive slurries, powders or coarse substances in various industries.

Slurry Knife Gate Valves

Heavy duty slurry knife gate valves for demanding shut-off applications involving abrasive slurries in industrial process plants.

Flowrox pumps

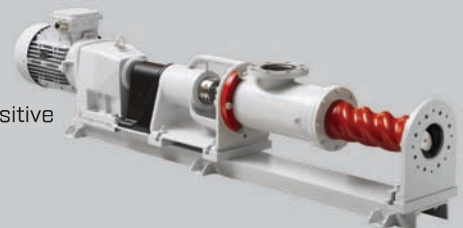

Peristaltic Hose Pumps

For processes involving industrial pumping, dosing and accurate metering of abrasive, corrosive and other demanding slurry duties.

Progressive Cavity Pumps

For reliable and efficient low shear dosing and pumping of abrasive, wearing, high viscous, corrosive or otherwise difficult or sensitive media.

Specialized products

Flowrox Scaling and Deposition Watches

Accurate online measuring of scale or deposition growth in a piping system to save chemical usage and downtime

Flowrox Expulse pulsation dampener

Flexible inline pulsation dampener to quiet noise and settle pressure peaks and uneven flows in processes.

Industrial Services

Customized service packages for flow control and pumping applications

Flowrox's long-term research and development program ensures new product launches on a regular basis.
